

## Seeking a primary healthcare provider or family physician?

Unfortunately, at this time, our physicians and nurse practitioners are not accepting new patients. If you are a patient of Dr. Macpherson's, please know that we are actively recruiting for a physician to join the team, however, there are no guarantees. In the meantime, please:

- Ensure that you are registered with [Healthcare Connect](#) if you don't currently have a physician
- Use the services of VTAC for any health concern (1-844-727-6404). This is a 24/7 virtual triage and assessment centre with round the clock access to medical receptionists, physicians and community paramedics.

Renfrew County is an underserved area with a lack of primary healthcare providers (doctors, nurse practitioners, etc.). There are many groups of individuals working towards changing this through active physician recruitment. Please know that we sympathize with your situation and hope that you take solace in the fact that we are working towards bringing more providers to this area.
